After Hours Care

For a Medical Emergency, Call 9-1-1

A medical emergency is a sudden, unexpected illness or injury that poses an immediate threat to life, limb, or function.

For:

Sprains, cuts, fever, flu, or other less urgent concerns, you may wish to go to a local Urgent Care Facility.

Urgent Care facilities offer:

Medical care, laboratory testing, and x-ray for illness and injury that are not life-threatening. There are fees for these services, however, they cost much less than a trip to the emergency room, and usually take less time.

Questions about coverage and cost?

Call the number on the back of your insurance card to find out which healthcare provider is preferred and to find out your specific coverage.
